

SUPERVISION

ASPHERIC SOFT CONTACT LENS

www.supervision.com.my

Company Profile

Supervision Optimax Sdn Bhd (Supervision) is a Malaysian-owned contact lens manufacturing company that produces high quality soft contact lenses.

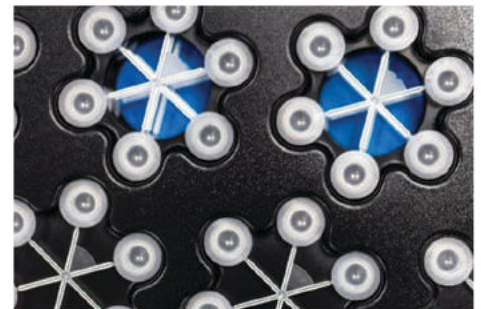

Our mission is to help people see better so that they can bring out the best in them. We produce high quality lenses at competitive prices. Our manufacturing facility runs in high efficiency.

At the moment, we have several Authorized Distributors worldwide, including the United States of America, Canada, United Kingdom, Japan, Brazil and Hong Kong. We are actively seeking Authorized Distributors around the world to distribute our contact lenses.

Manufacturing

At Supervision, all our contact lenses are manufactured using the latest state-of-the-art technology from the United Kingdom, housed in a world-class clean room environment.

Our fully-automated production lines eliminates manual operation mistakes, reduces lead time and provides good product hygiene. This ensures a stable and consistent, high quality production standard whilst keeping manufacturing cost competitive at all times.

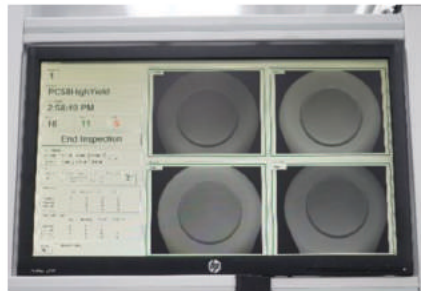

Cast Moulding

All our lenses are made using automated cast moulding technology. Once manufactured, our lenses undergo stringent quality control checks to ensure we deliver only the best lenses to wearers. We make our lenses in such a way that wearers will be able to experience exceptional comfort all day long.

MPC Technology

Our lenses are biocompatible with Methacryloyloxyethyl Phosphorylcholine (MPC). The hydrophilic material mimics part of the human cell membrane, thus allowing the lens to maintain hydration with extremely low lipid absorption and protein deposition. In other words, Supervision brand contact lenses provides high quality vision while ensuring longer lasting moisture during the entire lens wear duration.

HD Camera

Every lens from our production line will have to pass through a high-definition inspection camera. The camera will detect imperfections such as cracks, scratches and any defects found on the lens. Defective lenses will be automatically rejected to ensure that only the best lenses are released to our consumers.

Product Features

The superior quality of our contact lenses is the ultimate choice for hassle-free, healthy, comfortable and excellent visual performance.

COMFORT

MPC is a biocompatible material commonly used to improve biocompatibility. It also helps to maintain hydration while minimizing lipids absorption and protein deposition. These features allow the lenses to stay hydrated and comfortable all day.

AFFORDABILITY

We offer the highest quality products at competitive prices.

VISION

The aspheric design of the contact lenses reduces spherical aberration and provides high quality vision in all light conditions.

Product Specifications

PC-58

Material	Omafilcon A
Water Content	58%
Diameter	14.2 mm
Base Curve	8.6 mm
Centre Thickness	0.070 mm (@-3.00D)
UV Blocker	Yes
Powers	-0.50D to -6.00D (in 0.25D increments) -6.50D to -10.00D (in 0.50D increments) +0.50 to +4.00D (in 0.25D increments) +4.50 to +6.00 D (in 0.50D increments)

PC-55

Material	Filcon II 2
Water Content	55%
Diameter	14.2 mm
Base Curve	8.6 mm
Centre Thickness	0.070 mm (@-3.00D)
UV Blocker	Yes
Powers	-0.50D to -6.00D (in 0.25D increments) -6.50D to -10.00D (in 0.50D increments) +0.50 to +4.00D (in 0.25D increments) +4.50 to +6.00 D (in 0.50D increments)

Private Label Opportunity (OEM)

We have the facilities to support the manufacture of contact lenses on a private label basis using our MPC material technology, as well as using other materials of your choice.

We look forward to building a long term business relationship with you!
