

oithox®

Environmental Health Ready to Use

plus⁺_{UL} insektisit

Oithox Difference

Oithox Plus UL Insecticide is the first and only licensed for 11 pests and is a broad spectrum ready-to-use pesticide that does not contain hazardous solvents. It is odorless, does not leave stains, does not flow, is applied directly. It can be applied by anyone without using masks and protective equipment. Its effect is permanent, it solves even the most difficult pest problem for at least 3 months. The product affects the nervous system of the insect that breathes the trachea and causes it to die after a while. Oithox Plus UL Insecticide can be applied to all surfaces indoors and outdoors. You can safely use Oithox Plus UL Insecticide product in your home and in all your living spaces. Oithox Plus UL Insecticide is licensed as a Biocidal product by the Ministry of Health.

As Oithox Environmental Health, all pesticides we produce to protect people and our food resources are water-based and produced without the use of dangerous solvents. Our mission is to produce this process in the healthiest way without harming the environment, microorganisms and people.
