

RAPID DECOM COMPOST ACCELERATOR

RAPID DECOM (RCom) – COMPOST ACCELERATOR

A Bio-Herbal liquid formulation used to accelerate the decomposition of food and garden wastes within 15 to 21 days.

RCom is currently the World's Fastest Non-Mechanical Composter in the market. One litre of RCom can treat 250 kg of wastes. It is 100% organic USDA certified and HALAL.

Specifications:

- A brown liquid mixture with slight pungent smell
- Includes mineral oxides (sources of trace mineral nutrients)
- Available in 1 Litre & 5 Litres plastic bottle and 25 Litres plastic jerry can.

Shelf Life:

2 years for unopen pack. Diluted RCom should be used within 1 month

Benefits of RCom:

- Fast composting period. Thus providing cost savings in fertilizer for farmers.
- Boost plant growth and crop yield by up to 100%
- Compost will have higher micronutrients and has N-fixing quality. The longer you keep the compost, the higher is the N content.
- Make a groundbreaking contribution to the environment. You will be sequestering carbon and offsetting the impact of global warming gases like carbon dioxide.

What is it made from?

RCom is a proprietary formula developed by IP owner, Dr. Muhammad Yani (PhD). The formula contains activated carbon that increases existing microbes in any waste piles. Thus increasing the lead time for the compost to mature. The materials used are all from sustainable, natural sources and are 100% organic.

Storage:

Keep under shelter and away from children.

First Aid Measures:

May irritate eyes and skin. Use rubber gloves when handling. Rinse thoroughly if in contact with eyes or skin.

Not for consumption. If consumed, drink water or milk and seek further medical treatment.

How to use RCom?

- Collect garden wastes and/or food wastes into compost bin;
- Dilute Rapid Decom with water at ratio of 1:20
- Spray bit by bit, thoroughly into wastes each time you throw wastes into the bin and close lid;
- Add Leachate Absorber or soil to the wastes after every sprays.
- 1 litre of Rapid Decom can treat 250 kg of mixed wastes.
- When full, spray final round to the wastes.
- Close container and wait for 15-21 days;
- When applying to plants, mix 60% of the compost with soil.
